VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The disclosures "data characteristics of the data" and "quality control information" in claims 1, 17, 23 and 25-28 can have a plurality of meanings, and the scope of these disclosures is unclear in the light of the disclosures of the description.

Consequently, it is unclear whether the scope of these disclosures includes the "packet classifications" that are disclosed in document 2 (paragraph [0036]) cited in the international search report.
